Muhammad Arshan Ashraf Siddiqui

FULL-STACK DEVELOPER · REAL-TIME & EVENT-DRIVEN SYSTEMS

Karachi, Pakistan | +92 334 3739894 | **arshanashraf2002@gmail.com**
github.com/Arshanashraf | linkedin.com/in/arshan-ashraf-650124288

PROFESSIONAL SUMMARY

Full-stack developer who builds real-time and event-driven web applications end to end. Comfortable across the stack — React.js interfaces on the front, Node.js and Fastify services behind them — with hands-on work in WebSocket communication, message brokers (Apache Kafka, RabbitMQ), and Docker-based deployment. Focused on writing modular, maintainable code and shipping features that reach production.

TECHNICAL SKILLS

Languages	JavaScript, Python, C++, HTML5, CSS3
Frontend	React.js, Redux, Tailwind CSS, Bootstrap, responsive design
Backend	Node.js, Express.js, Fastify, REST APIs, Appwrite
Databases	MongoDB, MySQL
Real-Time	WebSockets, Socket.IO, Apache Kafka, RabbitMQ, event-driven architecture
DevOps & Tools	Docker, Git, GitHub, Postman, VS Code, Chrome DevTools
AI & APIs	Hugging Face API, AI chatbot development, prompt engineering, REST API integration
Currently learning	TypeScript, Next.js, LLM integration and retrieval-augmented generation (LangGraph, LlamaIndex, Ollama)

EXPERIENCE

Frontend Developer Intern

Nov 2024 - Dec 2024

DevelopersHub.co — Remote

- Built responsive UI components in React.js for customer-facing features.
- Improved application performance and usability across screen sizes.
- Collaborated on real-world feature work and production deployments.

PROJECTS

Real-Time Chat Application

Node.js · Fastify · Socket.IO · MongoDB · Docker github.com/Arshanashraf/CRUD-SOCKET.IO

- Built a real-time chat system using Socket.IO over Node.js and Fastify, with WebSocket-based bidirectional messaging for instant delivery.
- Persisted conversation history in MongoDB and structured the service into modular layers for maintainability.
- Containerized the application with Docker so the environment behaves identically in development and deployment.

Kafka-Based CRUD System

Dockerized microservice architecture

Node.js · Apache Kafka · Zookeeper · Docker github.com/Arshanashraf/Kafka-crud-docker

- Built a CRUD backend where services communicate through Apache Kafka topics instead of direct calls, giving an event-driven flow with decoupled producers and consumers.
- Implemented producer–consumer pipelines for asynchronous data processing and status tracking.
- Containerized Kafka, Zookeeper, and the application services with Docker for reproducible, scalable deployment.

ApexBot — AI-Powered Chatbot

Deployed

React.js · Vite · Tailwind CSS · Redux · Hugging Face API github.com/Arshanashraf/AI-powered-Apexbot

- Built an AI chatbot that generates responses through the Hugging Face API, following a modular component-based architecture.
- Managed conversation state with Redux and deployed the build to Netlify and Hugging Face Spaces.

E-Commerce Web Application

Internship project

React.js · Redux · Tailwind CSS github.com/Arshanashraf/Ecommerce-webDesign

- Developed a full e-commerce front end with product filtering, search, pagination, and cart flows driven by Redux.
- Built dynamic order-summary logic and shipped a production-ready deployment.

EDUCATION

Bachelor of Computer Science

2024 - 2028 (Expected)

Sindh Madressatul Islam University, Karachi
